Often IT rental is only a small part of a much larger project. In addition to providing technology, logistics and installation, we can provide project managers and coordinators **to ensure your entire project is delivered on time and within budget.**

Whether you're looking for a team of skilled project managers or qualified resources to handle major change or strategic projects, or simply want to tap into additional capacity or personnel for a one day event, our specialists will hit the ground running.

### Our project management services enable you to:

**Deliver projects faster with clarity and efficiency** – Providing a single point of accountability for all project information and updates, decreasing confusion and increasing accuracy.

**Manage time and deadlines** – Providing the expertise and experience correctly to assess and manage the scope of the project, ensuring all aspects are delivered on schedule.

**Control cost** – This includes people resources, both internal and external, and any expenses and equipment costs.

**Mitigate risk** – Providing management and control throughout the entire project lifecycle, with a plan that anticipates and identifies risks and creates a process to address or prevent any problems.

As a leading IT Rental company, we have an impressive track record when it comes to **empowering organisations to achieve technology outcomes** – and project objectives – faster.

## Why Hamilton Rentals

Our project management teams can provide every aspect of the project life-cycle, from concept to definition, implementation and final handover. Our people will work with you to see your project's vision realised. In past we have helped our customers successfully delivery projects and events of every shape and size.

We can augment your existing team providing the right amount of skilled resources exactly when and where they are required
